PREFACE

This training document was developed by the Program Development and Standards Unit of the Ministry of Training, Colleges and Universities, in consultation with representatives from the Underground Soft Rock Mining industry. These Training Standards are intended to be used by trainee, trainers/instructors and companies as a "blueprint" for training or as a prerequisite for government accreditation/certification. While this training document is intended as guidelines for training, all issues might not apply in all operations.

A Basic Underground Soft Rock Miner (entry level) is a worker who has achieved accreditation in the entire Common Core Program #770130. The Mining Tripartite Committee (MTC) recommends that the employer must provide training in the entire common core for the Basic Underground Soft Rock Miner Training Program, to the worker, within the first year of employment. This 1 year requirement is legislated under the Occupational Health and Safety Act (OHSA) – R.R.O. 1990 Regulations 854, 11.3.

The first three modules of Program #770130 – U5510, U5511 and U3126 are prerequisites to all other modules for the program. They must be completed before any other modules can be done and before the employee can be permitted to work underground.

Prerequisite Common Core modules related to a specialty module must be taken before training in the specialty module commences. *NOTE: For Program #770130 the common core module U5512, Operate Utility Vehicle (Personnel Carriers/Service Vehicles) is a prerequisite to any specialty module that involves operating mobile equipment.* Employers have a responsibility to train workers for the work to be done.

Under the OHSA - R.R.O. 1990 Regulation 854, 11.3 there is an allowance for the recognition of equivalent training from other jurisdictions. In addition, the MTC has conducted a comparison of Ontario's Soft Rock Miner and Hard Rock Miner programs, #770130 and #770110 and found certain corresponding modules to be equivalent. Employers should contact their Local Apprenticeship Office for details about the requirements associated with these equivalencies.

New trainees or experienced miners must obtain accreditation in the same way. Each must demonstrate the skills specified in each Performance Objective to the described minimal acceptable standard as prescribed in each module. These demonstrations must be administered in an operating mine by a trainer designated by the company who shall follow the Performance Demonstration Guidelines approved by the Mining Tripartite Committee.

The care and maintenance of this book is the joint responsibility of the trainee and the employer. The Training Standards were developed specifically for documenting the trainee's acquisition of skills.

PREFACE - Cont'd

Areas of the Basic Underground Soft Rock Common Core including scaling, lock out and tag and handling blasting agents may infringe on some specialty modules for purposes of safety and technological changes. However, accreditation in these areas of the Common Core is not intended to replace accreditation in the specialty modules.

Throughout the document the term "including" is often used. "Including" means: one or more of the items listed, but not limited to those items included in the list.

NOTICE/DECLARATION FOR COLLECTION OF PERSONAL INFORMATION

1. This information is collected under the authority of the Order-In-Council Number 701/85.

2. The information is collected for the purpose of administering this modular training program within the Province of Ontario.

3. Questions regarding collection and use of this information may be directed to:

IMPORTANT DIRECTIONS TO TRAINERS

Trainers instructing workers in the specialty modules for Program #770130 must meet the Trainer Qualification and Criteria Guidelines for Program #770130. They must be accredited in the Basic Common Core Underground Soft Rock program #770130 and the specialty module they will be instructing. Contact your local apprenticeship office for a copy of the Trainer Qualification and Criteria Guidelines.

The Training Standards identify skills required for this occupation and its related training program.

These Training Standards have been written in concise statements which describe how well a trainee must perform each skill in order to become competent.

In using these Training Standards, trainers will be able to ensure that the trainee is developing skills detailed for the occupation.

Trainers and trainees are required to sign off and date the skills following each successful acquisition.

Employers participating in this training program will be designated as the Signing Authority and are required to attest to successful achievement in the space provided at the end of each unit.

IMPORTANT DIRECTIONS TO THE TRAINEE

Trainee

1. It is the responsibility of the trainee to inform the local Apprenticeship Client Services office regarding the following changes:

   - change of trainee name or address; and
   - transfer to a new employer.

2. Training Reports must be signed for modular trainees by a Ministry of Training, Colleges and Universities designated Signing Authority and forwarded to a local Apprenticeship Client Services office.

3. At the completion of training, the Trainee Completion Form must be completed and signed off by the Signing Authority and submitted to local Apprenticeship Client Services office.

UNDERGROUND SOFT ROCK MINING SPECIALITY MODULES LISTING BY GROUPS

GROUP 1 PRODUCTION (9)

U3141	Operate Over/Under Cutter
U3142	Operate Mechanized Jumbo Drill
U3143	Perform Loading and Blasting
U3144	Perform Mechanical and Manual Scaling
U5526	Operate Mechanized Rock Bolter
U5527	Operate Pneumatic Rock Bolter Equipment
U5528	Operate Continuous Miner Equipment
U5529	Operate Gathering Arm Loader
U5530	Operate Degassing Drill

GROUP 2 CONVEYANCES AND SERVICES (4)

U3146	Operate Haulage-Track
U3148	Operate Feeder Breaker/Crusher
U3151	Perform Underground Construction
U5535	Operate Conveyor

GROUP 3 SHAFT SERVICES (4)

U074	Operate Mine Hoist – Friction or Drum
U3147	Perform Shaft Maintenance
U5540	Operate Skip
U5541	Operate Cage

TRAINEE COMPLETION FORM

Trainee Name: _____
Print

_____
Signature

Social Insurance Number: _____

Training Units when completed should be signed off by the Trainer/Signing Authority Employer on the following page and presented with this completion form to your local Apprenticeship Client Services office. Any supporting documentation should also be attached.

TRAINING UNIT COMPLETION FORM

TRAINING UNIT	TITLE	SIGNING AUTHORITY
U5529	Operate Gathering Arm Loader	_____

U5529 OPERATE GATHERING ARM LOADER

GENERAL PERFORMANCE OBJECTIVE

Operate gathering arm loader, by identifying and responding to workplace hazards; inspecting work area for ground conditions and related hazards; performing pre-operational checks on gathering arm loader; tramming gathering arm loader; advancing trailing cable; conducting operational checks on gathering arm loader; operating gathering arm loader; and parking and shutting down gathering arm loader according to government legislation, company standards and manufacturer specifications.

PERFORMANCE OBJECTIVES

Trainer's Name (Print) _____ Trainee's Name (Print) _____

SKILLS

5529.01 Identify and respond to workplace hazards, including: ground conditions, ventilation, housekeeping, by isolating area; wearing required retro-reflective outerwear; repairing and/or reporting deficiencies according to government legislation, company standards and manufacturer specifications.

Date Completed _____ Trainer's Signature _____ Trainee's Signature _____

5529.02 Inspect work area for ground conditions and related hazards, by visually checking the work area; following scaling procedures as required; checking ventilation flow; locking out and tagging; and repairing and/or reporting deficiencies according to government legislation, company standards and manufacturer specifications.

Date Completed _____ Trainer's Signature _____ Trainee's Signature _____

U5529.0 OPERATE GATHERING ARM LOADER – cont'd

5529.03 Perform pre-operational check on gathering arm loader, by checking for oil leaks; testing/wiggling switch; ensuring scaling bar and paint are available; inspecting principle components, including: checking for structural integrity, flights and conveyor chain, tramming tracks, tramming handles, guards, lights and trailing cable; listening for unusual noises; locking out and tagging; and repairing and/or reporting deficiencies according to government legislation, company standards and manufacturer specifications.

Date Completed	Trainer's Signature	Trainee's Signature
_____	_____	_____

5529.04 Tram gathering arm loader, by determining position of head; following cable handling procedures as required; ensuring trailing cable is kept away from tramming tracks; locking out and tagging; and repairing and/or reporting deficiencies according to government legislation, company standards and manufacturer specifications.

Date Completed	Trainer's Signature	Trainee's Signature
_____	_____	_____

5529.05 Advance trailing cable, by ensuring cable is anchored as required; locking out and tagging; and repairing and/or reporting deficiencies according to government legislation, company standards and manufacturer specifications.

Date Completed	Trainer's Signature	Trainee's Signature
_____	_____	_____

U5529.0 OPE ATE GATHERING ARM LOADER – cont'd

5529.06 Conduct operational check on gathering arm loader, by following designated travel routes; checking position and length of trailing cables; ensuring required ventilation; noting direction of ventilation flow and position of ventilation/fire doors; checking roof conditions; ensuring clearance of gathering arm loader; locking out and tagging; and repairing and/or reporting deficiencies according to government legislation, company standards and manufacturer specifications.

Date Completed	Trainer's Signature	Trainee's Signature
_____	_____	_____

5529.07 Operate gathering arm loader, by ensuring required ventilation; noting direction of ventilation flow and position of ventilation/fire doors; positioning trailing cable; monitoring roof conditions; ensuring clear walking path to operator side of the loader; checking muck pile for undetonated explosives; starting loader at 45 degree angle to pillar as required; waiting for hauler operator to put rock guard in place; setting tail height to accommodate room height; monitoring tail height position throughout loading process; scaling roof as required; marking bootlegs and misholes; locking out and tagging; and repairing and/or reporting deficiencies according to government legislation, company standards and manufacturer specifications.

Date Completed	Trainer's Signature	Trainee's Signature
_____	_____	_____

5529.08 Park and shutdown gathering arm loader, by positioning machine a safe distance from face; ensuring machine is out of direct line of fire of blast; checking trailing cable; lowering head and tail; turning off power; locking out and tagging; and repairing and/or reporting deficiencies according to government legislation, company standards and manufacturer specifications.
